NOTES

Dogs come in all different shapes and sizes, so make sure you try the sweater on your dog if you can as you go! Many of my testers adjusted leg hole position and size (with some of them casting on additional stitches and adding decreases in later rows to adjust for the increases).

Some of my testers also added length before getting to the short rows and/or added additional length to the collar.

Especially with the smaller sizes, you'll want to use a magic loop to cast on your stitches and work the first few rows. I like this tutorial from Purl Solo: https://www.purlsoho.com/create/magic-loop/
